

# Lucas Lifbom

## Full-Stack Engineer

lifbomweiss@gmail.com | Stockholm | [GitHub](#) | [LinkedIn](#)

### SUMMARY

---

Backend-leaning full-stack engineer building scalable systems with Rust, TypeScript, and PostgreSQL. Experienced in shipping production SaaS platforms with authentication, billing, and real-time backend services.

### PROFESSIONAL EXPERIENCE

---

#### Ponchii, Stockholm

2025 - Present

Full-Stack Engineer

- Built and launched [Ponchii.com](#), an early-stage SaaS platform enabling users to create and subscribe to content
- Architected and implemented a **Stripe Connect marketplace**, enabling creator onboarding, subscription billing, and revenue distribution between users
- Implemented **Stripe webhook-driven billing workflows** to synchronize subscription state and enforce paywalled access in real time
- Built an **asynchronous account lifecycle system** with idempotent job processing (Supabase Edge Functions + cron) to safely handle subscription cancellation, access expiry, and account deletion
- Designed a **serverless full-stack architecture** (Next.js, PostgreSQL, Supabase, Stripe) supporting authentication, payments, and relational data workflows

#### Wonlik Toad Creations, Stockholm

2025

Full-Stack Developer

- Built the MVP of a SaaS application using **Next.js, TypeScript, Firebase**
- Implemented **authentication, real-time data updates, and core CRUD functionality** for user workflows
- Collaborated on product requirements and rapidly iterated on features in an early-stage startup environment

### PROJECTS

---

#### Real-Time File Transfer Service

- Built a **real-time** file transfer system in **Rust (Axum)** supporting live, one-time transfers over **WebSockets** with no persistent storage
- Designed a **session-based** protocol with **async concurrency** (Tokio + mpsc), enabling **low-latency** streaming and **bounded in-memory** state per transfer
- [github.com/l-lifbom/drop](https://github.com/l-lifbom/drop)

### SKILLS

---

Rust, TypeScript, Python | Node.js, WebSockets, REST APIs | PostgreSQL | Docker, AWS  
Stripe, Supabase | Next.js

### EDUCATION

---

#### Chas Academy, Stockholm

2023 - 2025

Full-Stack Developer
